

EnergySmart helped Dick and Catherine Harris realize that they didn't need to build a whole new house to make their dream home a reality.

"I knew that I had air leaks in my house and huge open areas in the attic that needed to be sealed, but it never occurred to me, until I participated in EnergySmart, that I could do something about it"
- Dick Harris, EnergySmart Customer

It doesn't take a new house...just EnergySmart

Catherine Harris poses next to her new efficient refrigerator, thrilled about her energy savings!

>>> Meet Dick and Catherine Harris

The frustrations of mopping up melted ice from window sills convinced Dick and Catherine to sign up for an EnergySmart Assessment, and they were happy they did. The assessment helped them to realize that they didn't have to rebuild their home to make a significant impact in their comfort levels and in their home energy use.

Based on recommendations from their EnergySmart advisor, Dick and Catherine decided to "do it right" by upgrading their ceiling and attic insulation and by trading out their old refrigerator for an energy efficient one before making more aesthetic changes. Now that the Harrises have done their technical upgrades, they are looking forward to a warmer home and new frost-free windows.

"Having the list of contractors was really important to me- I don't react well to ads that promise enormous results in a glamorous way. I just want them to do the work right, which is what EnergySmart and the contractors did!"- Dick Harris

EnergySmart Provides:

- ▶ An Expert EnergySmart Advisor
- ▶ A home energy assessment
- ▶ Installation of **FREE** energy-saving items
- ▶ Customized energy-saving recommendations
- ▶ Help finding qualified contractors
- ▶ Assistance with rebates and financing

SMART STATS

Dick and Catherine Harris upgraded their insulation and refrigerator and are looking forward to replacing their old windows with new energy efficient ones.

UPGRADE IMPACTS:

Estimated heating bill reduction	30%
Estimated heating bill savings per year	\$570
Estimated CO2 emissions averted (metric tons):	3.38

Equal to averting the consumption of 379 gallons of gasoline!

EnergySmart services are available to homes in all Boulder County communities, and are also available for Boulder County businesses.

EnergySmart is funded by the American Recovery and Reinvestment Act (ARRA) through the Department of Energy's BetterBuildings Program and sponsored in partnership with Boulder County, the City of Boulder's Climate Action Plan Tax, the City of Longmont, and Xcel Energy
