

WILDFIRE PARTNERS PROGRAM PROCESS

1

Apply

Visit www.wildfirepartners.org and fill out the on-line application. An acceptance email will be sent indicating acceptance, wait-list or rejected status.

2

Acceptance

Once accepted, the homeowner will be required to sign a waiver and pay a \$100 assessment fee.

3

Scheduling

Once the payment and waiver have been processed and received, a Phone Advisor will reach out to schedule an initial assessment.

4

Assessment

During the initial assessment, a Mitigation Specialist will walk the property and collect data to create a report on what mitigation work needs to be completed.

5

Mitigation

A report will be generated consisting of all mitigation work. This will be sent to the homeowner along with resources to assist in completing any home retrofit work or forestry contracting.

6

Award

The program will pay an award of 50% (up to \$2500 total), of the approved forestry contract work after submission of an approved bid and completion of the work.

7

Certification

Once all items noted as "required" on the report are completed, the homeowner can schedule a Mitigation Specialist to come back out to complete a Final Inspection. Upon passing this Final Inspection, and completing the Homeowner Reporting form, a Wildfire Partners yard sign and certificate will be awarded to the homeowner.
